## Problem Description:

- Build a model that represents the decomposition of an image using a JSON document. The model will be built using a tree representation to facilitate understanding and reuse.

# Web-Index

Solution:

# Web-Index

## Solution:

- First Step:
  - 1) Create a function to retrieve a json document using MongoDB.
  - 2) For each cluster find the number of vertices.
  
- Second Step:
  - 1) Create a tree representation of a image using javascript.
  - 2) Display the number of vertices on the tree
